PROFESSIONAL SUMMARY

I'm experienced in building responsive websites using HTML, CSS and JavaScript. Currently developing my skills in React and Tailwind CSS through hands-on projects. I aspire to understanding logic and structure. Strong mindset, self-driven learner, with a clear goal of working on driven projects.

WORK EXPERIENCE

Freelance Front-end Developer (December 2025 - present)

Self-employed - Cameroon

- Designed and developed responsive websites for clients
- Applied mobile-first design principles to ensure compatibility across all devices
- Delivered projects independently

Founder & Product Builder (May 2026 - present)

SmartBay - Cameroon

- Founded and developed SmartBay, a SaaS platform for rental property management
- Built and maintained the web application using React, Vite, Tailwind CSS & Firebase
- Designed the user experience (UI/UX) and product strategy
- Managed deployment, testing, debugging and continuous iteration
- Built the product in public and worked toward acquiring early users

EDUCATION AND CERTIFICATIONS

Self-taught Front-end Developer (October 2025 - present)

Online resources & practice

- Mastered HTML, CSS and JavaScript through structured self-learning
- Built real-world projects including a complete professional portfolio
- I've built SmartBay, a web application with allows landlords to manage their tenants.
